**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Cancel claim 13.

***Allowable Subject Matter***

2. Claims 1-12 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record, either singly or in combination, fails to disclose the limitations of:

doping the predetermined area of the semiconductor blank with the dopant until a concentration of the dopant is at least as high as the target concentration of the second region;

forming a spacer in a self-adjusting manner with respect to an edge of the window such that the spacer defines the first region; and

diffusing the dopant outward from the first region until the concentration of the dopant corresponds to the target concentration of the first region;

wherein the first region has a target concentration of the dopant that is lower than the target concentration of the dopant in a second region.

The prior art of record does show doping with another dopant using the spacers as a mask and then diffusing both of the dopants to form the base (which is what the applicant is describing) and the dopant to form the emitter. However the applicant discloses losing concentration of dopant only during diffusion of the base, prior to forming the emitter, and therefore is distinct from prior art

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
